COURAGE

Volcano, Hawaii - #61

Skillful archers of awakened accuracy,

Realize that although you are at the very inception of your wondrous migration of eternity, there are vital virtues of mortality necessary to your progress. Courage is a unique and temporary attribute of expansion in your mortal existence that is pre-supernal, pre-fusionary, and pre-cognizant of self-actualization.

The valorous power of faith and trust in the First Source and Center will permeate your being with the courage to become the embodiment of Supreme will. Once you enter your cherished supernal transformation, you will forever outgrow your essential need for courage since courage can only manifest in a climate of fear. As you comprehend the certainty of the Father's love, you will be saturated in the peaceful beauty of tranquility and safety that transcends the requisite for trepidation. But for now, understand its noble value in the commencement of your ascension career. Seek its expanding development as a necessary element of the continual flourishing of your maturing spirit evolution. Aspire to the courage to speak with wisdom and act in the guidance of inspired surrender. Let courage illuminate your darkened caverns of tremulous hesitation and endow you with the everlasting immunity of His divine refuge in the perfect shelter of His eternal warmth of loving security.
